Wiggly Jiggly Crystal Ball

Ingredients and Supplies

4 packages (3-ounces each) yellow Jell-O

2 envelopes unflavored gelatin

6 C boiling water

Melon

Cantaloupe

Watermelon

Blueberries

Mini star and moon shaped cookie cutters

Procedure

In a large, deep bowl, mix the Jell-O and the unflavored gelatin. Pour the boiling water over the mixture and stir until completely dissolved. Refrigerate for 1½ hours, or until partially set. Use cookie cutters to cut the melons into stars and moons. Press all the fruit into the partially set gelatin, then refrigerate for 4 more hours, or until set. Place the bowl in a pan of hot water to loosen the Jell-O from the sides, then invert onto a platter. Surround crystal ball with slices of cantaloupe.
