# Pete Goes To Mars

## Ingredients and Supplies

4 packages Berry blue Jell-O - Universe

1 package watermelon Jell-O - Mars

1 toy astronaut - Pete

Toy aliens - green **or** white works best

Medium sized aquarium **or** clear round bowl - Universe

## Procedure

Make watermelon according to package for jigglers. Place in a small round bowl. Refrigerate until firm. Place in warm water to unmold. Turn aquarium bowl upside down on top of bowl with watermelon Jell-O. Carefully unmold Jell-O into center of universe. Mix blue Jell-O according to package directions. Carefully pour into universe, making sure you do not disturb Mars. Place Pete (astronaut) beside Mars. Refrigerate until slightly firm. Remove from refrigerator and carefully place aliens around the universe. Refrigerate until firm. **Note:** How it got the name. Our friend, Pete, is very interested in the Mars Society. Just before his first trip to Utah, he had a party at his house. I wanted make something to keep within the Mars theme. This is what I came up with.
